A PITTSBURGH PARTNERSHIP

## Humans as an Evolutionary Patchwork

---

*Alan Walker,  
Pennsylvania State University*

---

**February 12, 2009**  
*(Darwin's 200<sup>th</sup> birthday)*

**7:30PM**

**Duquesne University**  
**Union Ballroom**

*Act 48 credit available for K-12 teachers*

# Evening Lecture Series on Evolution

Duquesne University will host six evening lectures from February 12—Charles Darwin's 200<sup>th</sup> birthday—through early April. These lectures will examine the broad impact of evolutionary thinking on many areas of human thought, including biology, sociology, psychology and theology.

## Humans as an Evolutionary Patchwork

*Alan Walker, Evan Pugh professor of Anthropology and Biology,  
Pennsylvania State University*

Dr. Walker will address human evolution by presenting data that shows that the human body bears plain evidence of its evolutionary history. From our spine, to our limbs, to our large brain and upright stance, humans feature adaptations added at different times in our evolutionary history, for different reasons, that now function as an integrated whole.

**February 12, 2009**

*(Darwin's 200<sup>th</sup> birthday)*

**7:30PM, Duquesne University**

**Union Ballroom**
